

**Workshop on Geolinguistic Patterns
and Quantitative Approaches to Finnic Typological Diversity**

Tartu, September 3-4, 2026

Thursday, September 3

(Jakobi 2, r 106)

12 – Karl Pajusalu et al.: Workshop introduction

12.15 – Jean Léo Léonard et al.: Towards a Typology of Dialectometric Gradients: Finnic vs (Gallo-)Romance Dialect Continua/Networks from an Anchored Diasystemic Ecology (ADE) Standpoint

13.30 – Mari Väina: The Language of South Estonian Runosong: Patterns of Word Use across Regional Collections

14.15-15.15 Lunch break

15.15-17 – The KettuSa project: Overview and data collection principles

- Outi Vesakoski: What kind of new horizons joint Estonian-Finnish dialect atlas provides for interdisciplinary studies?
- Riku Pihkakoski ja Stiina Laine: How do we match the Kettunen and Saareste dialect atlases?

Friday, September 4

(Jakobi 2, r 428)

10-11.30 – Case studies of Saareste data

- Tatiana Kachkovskaia: Inferring phonological (and morphological) variation by aligning lexical entries
- Elias Koskinen: Search for dialect areas with model based clustering analyses

(Jakobi 2, r 423)

12-13 – Helle Metslang, Eva Saar, Karl Pajusalu: Presentation of the EstTyp project and the UraTyp2 dataset

13-14 – Final discussion: From the Kettunen's and Saareste's atlases to the Finnic (micro-) typological datasets.
